Angel David AVALOS CARRILLO

Torreón, Coahuila, México | +52 871 575 4593 | angeldavidavaloscarrillo@gmail.com
LinkedIn: **Angel David Avalos Carrillo** | GitHub: **DavidAvalos14**
Portfolio: **www.davidavalos14.com**

EDUCATION

Instituto Tecnológico de la Laguna | Aug. 2022 – Aug. 2027 (Torreón, Coah. Mx)
B.S. in Systems Engineering | Average: 96.1 / 100

EXPERIENCE

IT Intern | Jun. 2026 – Present
John Deere

- **Production System Development:** Maintain and develop new user-requested features for critical internal applications utilized directly on the manufacturing production line, ensuring system stability and operational efficiency.
- **UI/UX & Module Overhaul:** Completely redesigned and restored a core application module, transforming a non-intuitive panel into a fluid, fully functional user experience while identifying and resolving legacy bugs.
- **Incident Management & Troubleshooting:** Successfully resolved a critical production line downtime incident by rapidly diagnosing the root cause, building and versioning a hotfix, and deploying the solution to restore full manufacturing operations.

Software Developer & Official Statistician (Freelance) | Jan. 2024 – Present
Local Baseball Leagues (Liga de Beisbol Infantil y Juvenil Sertoma, Circuito Mayor de Béisbol de la Laguna)

- **Product Development & Scaling:** Spearheaded the digital transformation of league statistics by developing "Kompilacion," initially an automated Java/SQL Server desktop tool, later architecting its evolution into "KompilacionWeb."
- **Full-Stack Deployment:** Launched and deployed the web platform on a VPS (using technologies like React, C#, and Docker) to provide players and fans with 24/7 real-time access to standings and performance metrics.
- **Database Expansion & Optimization:** Redesigned the relational database structure to support multi-tenant architecture, accommodating new statistical categories and seamlessly managing data for multiple independent baseball leagues.
- **Process Automation:** Engineered advanced algorithms for performance calculations and automated tiebreaker criteria, achieving a 100% reduction in manual calculation errors across all managed leagues.

PROJECTS

Court Reservation | MERN, RESTful API, CSS3, JWT | Dec. 2025
- Developed a complete end-to-end web application for sports facility management using the **MERN stack** (MongoDB, Express, React, and Node.js).
- Designed a dynamic user interface for real-time court availability checking and reservation management.

MLB Tracker | Kotlin, Android Development, Retrofit, API | Dec. 2025
- Built a mobile application in **Android Studio** using **Kotlin** to track professional baseball statistics.
- Integrated external **APIs** to provide users with up-to-date league standings and team performance data.

Subnet Calculator | C++, QtCreator, IPv4, Networking | Sep. 2025
- Engineered a networking tool using **C++** and the **Qt Creator** framework to automate IP subnetting calculations.
- Implemented logic for calculating network prefixes, broadcast addresses, and host ranges for efficient network planning.

HONORS & AWARDS

Innovatec 2026 - Hackatec | 2nd Place Regional | Sep. 2026
- **Predicta:** Facilitated technical conflict resolution and mediated decision-making during the IoT hardware integration phase, enabling the engineering team to overcome critical blockers and deliver the prototype efficiently.

Innovatec 2025 - Hackatec | 3rd Place (National & Regional) | Sep. 2025 – Nov. 2025
- **SIMBA:** Acted as Project Manager and Technical Writer; pivoted project strategy based on mentor feedback and restructured team dynamics to empower key developers, securing 3rd place nationally.
- **EcoHydra:** Managed comprehensive technical documentation for an IoT real-time plant identifier system, ensuring clear communication and alignment across the team.

ICPC "Gran Premio de México" | 2024, 2025 & 2026
- Consistent participant in national-level algorithmic challenges, ranking 115th out of hundreds of participants nationwide in 2026.

TECHNICAL SKILLS

Languages: Java, C++, C#, JavaScript, SQL (MSSQL).
Frameworks / IDEs: ReactJS, QtCreator, Java NetBeans.
Developer Tools: Git, Github, VS Code, Docker.

LANGUAGES

Spanish: Native
English: Intermediate (B2)
